

A photograph of a wooden outdoor office structure in a forest. The structure is made of light-colored wood and has a flat roof that can be tilted upwards. It is mounted on a black metal post. The background is a dense forest of tall, thin trees with green foliage. Sunlight filters through the trees, creating dappled light on the ground. The ground is covered with dry leaves and some green plants.

OUTDOOR OFFICE THE BUG

This outdoor office solves the problem of the sun interfering with the computer screen. Designed and made in Sweden.

The background of the slide is a dark, atmospheric photograph of a forest. Sunlight filters through the trees on the right side, creating a bright, dappled light effect on the ground and foliage. The rest of the image is in deep shadow, with the silhouettes of trees and branches visible against the lighter background.

The Bug contributes to:

- No sun is reflected on the computer screen
- Better recovery and reduces stress
- Spending more time in nature improves mental health
- Increase of vitamin D
- Increase of productivity and creativity

A close-up photograph of a wooden chair. The chair features a light-colored wood with a prominent grain pattern. The seat and backrest are curved and appear to be made of thick wooden planks. The chair is mounted on a large, solid black circular base. The background is a plain, light-colored wall.

The Bug -The ergonomic furniture that is adapted to perform office work outdoors

The chair is 360° rotatable and protects you and your computer from unwelcomed sunlight that reflects in your screen. It shields and it attenuates sound and wind.

Now you can project lectures outdoors

The Whale - the room adapted to have lectures, meetings and workshops outdoors - without the sun interfering with the view of your screen

The Ant - a standing desk. Sit back, work on your computer and watch the lecture in front of you

The Ant - University of Gefle, Sweden

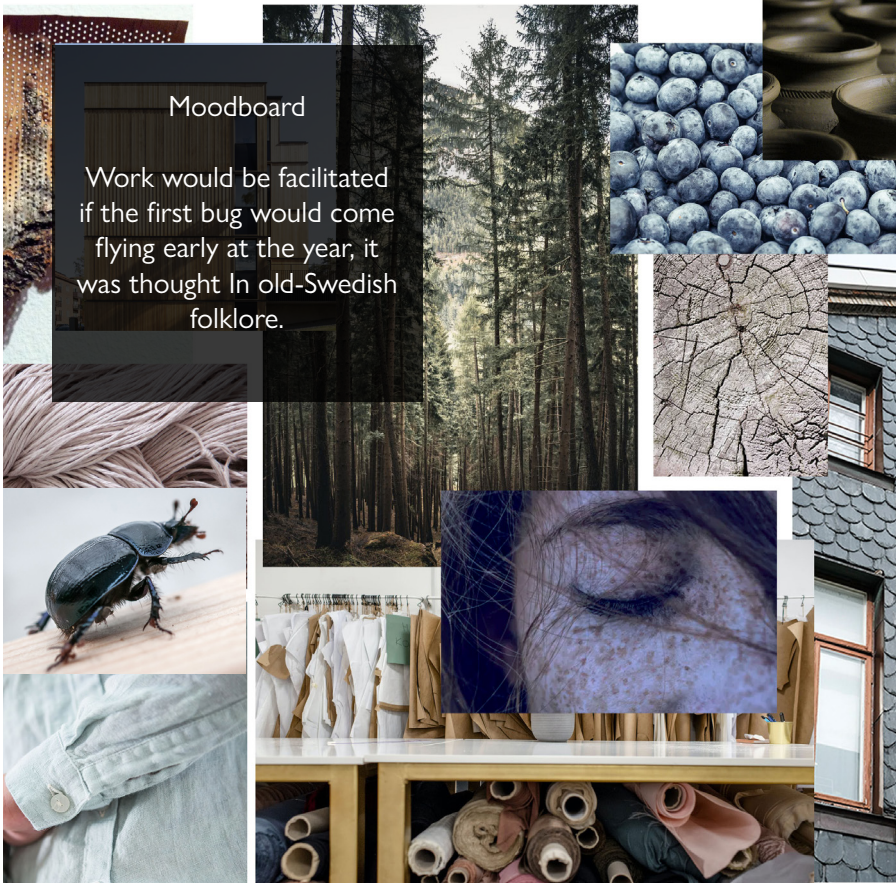

The Bug - Campus Umeå, Sweden

Moodboard

Work would be facilitated if the first bug would come flying early at the year, it was thought In old-Swedish folklore.

A photograph of two young women in a forest. One woman is sitting on a wooden bench with a canopy, wearing a black long-sleeved top, black pants, and white sneakers. The other woman is standing next to the bench, wearing a black long-sleeved top, black pants, and black sneakers. The background is a dense forest of tall, thin trees. The ground is covered with fallen leaves and some green plants.

Design Frida & Lovisa Pettersson

Sustainability

The foundation of Lovisa of Sweden is sustainability in every matter. We are exclusively working with wood from Swedish forests and Swedish steel. The production is also located in Sweden.
